

Distributor Bulletin

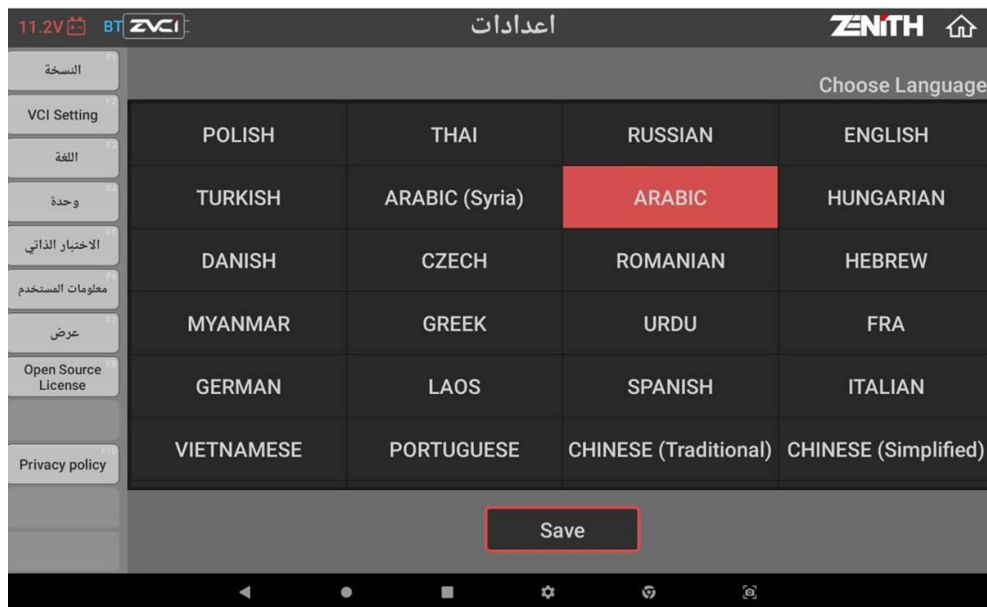

2026 June Update Summary

For EZDS's authorized aftermarket distributors

[AI Translation] (Zenith Z5 and Z7 only)

Added a feature that uses AI to translate untranslated text in the diagnostic menu, including DTCs, Sensor Data, and Actuation Tests.

The AI Translation function translates English text into the selected language. In order to activate the AI Translation function, users must first select a language other than English in the Settings menu.

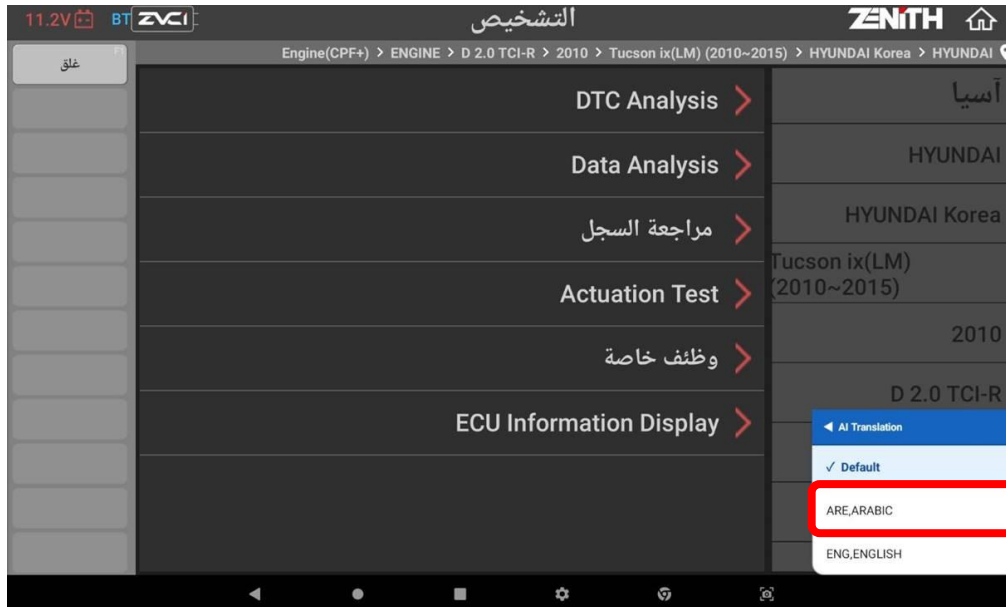

Distributor Bulletin

2026 June Update Summary

For EZDS's authorized aftermarket distributors

After performing a System Search on the vehicle, a Blue Plus icon appears in the bottom-right corner when viewing the DTC Analysis, Sensor Data, and performing the Actuation Tests.

By tapping the Blue Plus icon, users can choose to view the text either in the selected language or in the original English.

The translated text appears gradually as the AI processes the translation.
